A Safeguard.

The fata, rapidity with which slight Colds and Coughs frequently develop into the gravest maladies of the throat and lungs, is a consideration which should impel every prudent person to keep at hand, as a household remedy, a bottle of AYER'S CHERRY PECTORAL.

Nothing else gives such immediate relief and works so sure a cure in all affections of this class. That eminent physician, Prof. F. Sweetzer, of the Make Medical School, Brunswick, Me., says:—

"Medical science has produced no other anodyne expectorant so good as AYER'S CHERRY expectorant so good as AYER'S CHERRY ronal. It is invaluable for diseases of the at and lungs." The same opinion is expressed by the well-known Dr. L. J. Addison, of Chicago, Ill., who says:— Ill., who says:—
"I have never found, in thirty-five years of continuous study and practice of medicine, any preparation of so great value as Aven's Chenny Percroant, for treatment of diseases of the throat and imags. It not only breaks up colds and curve severe coughs, but is more effective than anything else in relieving even the most serious bronchial and pulmonary affections."

AYER'S Cherry Pectoral

Is not a new claimant for popular confidence, but a medicine which is to-day saving the lives of the third generation who have come into being since it was fast offered to the public.

There is not a household in which this invaluable remedy has once been introduced where its use has ever been ahandoned, and there is not a person who has ever given it a proper trial for any throat or lung disease susceptible of cure, who has not been made well by it. AYER'S CHERRY PECTORAL nas, AYER'S CHERRY PECTORAL mas, in numberless instances, cured obstinate cases of chronic Bronchitis, Larnygitis, and even acute Pneumonia, and has saved many patients in the earlier stages of Pulmonary Consumption. It is a medicine that only requires to be taken in small doses, is pleasant to the taste, and is needed . every house where there are children, as there is nothing so good as AYER'S CHERRY PECTORAL for treatment of Croup and Whooping Cough.

These are all plain facts, which can be

Chicago, December 5.—This has been a day of general declines in prices, the heaviest losses resulting to the grain trade and in spot transactions. The tendency is toward lower values in corn and wheat,

while in provisions there is an uncertainty n the minds of investors. The opening and closing prices of the day were as follows:

quotations have been slowly easing off.

From the start sellers could find no fault with the demand for good to choice beeves, but this class comprised, as hereofore, only a small proportion of the daily supplies, and for common sorts the situa-tion was anything but satisfactory. Not only were receipts of these unusually large, but there was less than the usual intage. Of course they made the most of their opportunities, and a decline of 10@ 15c was the result. Even that reduction failed to infuse any life into the trade, and the market was slow. Dressed-beef shippers secured some very decent animals at \$3.85@4, and the bulk of the trading was done under \$4.40. done under \$4.40. Te market for cows, bulls, and the riff raff generally, showed much irregularity There were some sales made at stead prices, while others showed a decline
